

House Trailer On-Site In Violation of City Ordinance

City Ordinance 2013-15

The City Council approved (March 26, 2013) **Conceptual Site Layout does not allow the house trailer on the property**

City Staff asked neighbors to notify the City when the trailer is brought on-site. City Staff, including Asst City Manager Laurie Brewer, have stated in emails to neighbors that the **City has instructed the owner 4-5 times not to bring the trailer on-site**, because it was a violation of the City Council approved Conceptual Site Layout.

Even though the City has told the owner the trailer can't be on-site, **the owner continues to bring it on-site for most events**. The owner usually brings the trailer on-site only on weekends, though the trailer has been on the property continuously from January 6, 2016 to the present. Neighbors have contacted the head of Code Enforcement, as instructed.

Google Maps has now **immortalized the on-site trailer violation on their Street View** that was taken in March 2015.
